Re: Notification – Draft Class A Report Review

Dear Diane Hollenbach:

As part of its ongoing review of water quality standards, the Department of Environmental Protection (DEP) is providing you with a copy of the draft Class A Wild Trout Streams evaluation report for comment before making a recommendation to the Environmental Quality Board (EQB). Please submit your comments within 45-days of the postmark date. Since there is a recommended change to the designation use, DEP is developing a proposed rulemaking for consideration by the EQB. Any comments received on the draft report will be summarized in the report that is presented to the EQB.

These evaluations were conducted in response to data submitted to DEP by the Pennsylvania Fish and Boat Commission (PFBC) pertaining to the addition of evaluated stream segments to the PFBC Class A Wild Trout Streams list.

When DEP develops a proposed rulemaking and the EQB approves it, you will also have an opportunity to comment during the official public comment period. This comment period will begin with publication of the proposed rulemaking in the *Pennsylvania Bulletin* and public notice in a newspaper of general circulation in your area.

Please provide a copy of this notification to all municipal authorities that have property ownership in your municipality. Feel free to provide a copy to any other parties you believe may be affected by or interested in this possible redesignation.

For further information, please contact Mark Brickner, Division of Water Quality Standards, Bureau of Point and Non-Point Source Management, Rachel Carson State Office Building, 11th Floor, P.O. Box 8774, Harrisburg, PA 17105-8774, phone: 717.787.9637 or e-mail mbrickner@pa.gov. Persons with a disability may use the AT&T Relay Service by calling 1.800.654.5984 (TDD users) or 1.800.654.5988 (voice users).

DEP understands that you or others in the community may have questions or concerns regarding the relationship between a stream redesignation, DEP permits and day-to-day activities in the watershed. Please feel free to contact us so that we can address the issues that are important to you, your citizens or local businesses and industries.

Sincerely,

Rodney Kime

Rodney Kime
Chief
Division of Water Quality Standards
