ONTELAUNEE HEIGHTS DEVELOPMENT

BOIL ADVISORY NOTICE

CHANGE IN DATE & TIME OF SCHEDULED SHUTDOWN

Homeowners located in the Ontelaunee Heights Residential Development will experience a loss of water pressure on November 10th at approximately 11:00 PM. This is a planned shutdown of the water main at Tamarack Blvd feeding the Ontelaunee Heights Residential Development. The medical building, bank and Giorgio Foods will also be affected by this shut down. Once the water is restored and until further notice, do not drink the water without boiling it first. Bring all water to a rolling boil and let it boil for one minute. People with severely compromised immune systems, infants and some elderly may be at increased risk. You will be notified when the water is again safe to drink by phone message and by checking the Township website and Facebook page. We anticipate that we will be prepared to lift the boil advisory on November 13th. Customers may want to stock up on drinking water and have a five-day supply of drinking water prior to the scheduled shutdown. If you have any questions, please call 610 926 4173. We apologize for the inconvenience this event may cause you.

HOMEOWNERS LOCATED IN THE ONTELAUNEE HEIGHTS RESIDENTIAL DEVELOPMENT MAY BE AT INCREASED RISK FROM MICROBIAL CONTAMINATION.

SCHEDULED SHUT DOWN OF WATER MAIN FOR REPAIRS - The Maidencreek Township Authority will be scheduling a shut down of the water main on Tamarack Blvd feeding the Ontelaunee Heights residential Development. Loss of **complete** water pressure is expected to occur on **TUESDAY, NOVEMBER 10TH, starting at 11:00 PM.** We anticipate a 2- hour shut down. A loss of positive water pressure is a signal of the existence of conditions that could allow contamination to enter the distribution system through back-flow by back-pressure or back-siphonage. As a result, there is an increased chance that the water may contain disease-causing organisms.

What should I do?

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a rolling boil, let it boil for one minute, and let it cool before using; or use bottled water. You should use boiled or bottled water for drinking, making ice, washing dishes, brushing teeth, and food preparation until further notice.

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.

These symptoms, however, are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you may want to seek medical advice.

Guardians of infants and young children and people at increased risk, such as pregnant women, some of the elderly, and people with severely compromised immune systems, should seek advice from their health care advisors about drinking this water. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1 (800) 426-4791.

What happened? What is being done?

A shut down of the water main located on **Tamarack Blvd feeding the Ontelaunee Heights Residential Development** is scheduled for **November 10th** when the contractor connects new pipe to the existing water main. We anticipate water will be shut off from **11:00 PM to 1:00 AM**. We will be flushing the system after the repairs are complete and will re-establish disinfectant residuals. Once all corrective actions have been completed, samples will be tested for the presence of coliform bacteria. Residents should expect to be notified by November 13th that you no longer need to boil your water. Please boil your water until notified by the Maidencreek Township Authority that you no longer need to boil your water. We will inform you when all corrective actions have been completed and when you no longer need to boil your water. **Phone messages along with the Township website and Facebook page shall be the primary means of communicating with our customers.** The Township website will be updated as quickly as possible, but the website notice may be delayed, especially during the weekends.
