To Whom This Concerns,

This letter is regarding an improvement project that we would like to seek approval for at 409 Acer Drive, Blandon PA 19510. Currently, there is a macadam sidewalk along side of the house stopping at a dead-end road. The sidewalk collects run water from the hill (see pictures attached).

At this time, we would like to replace the existing sidewalk in front of the property to a concrete sidewalk that adjoins the property. The corner of the property, the sidewalk would be upgraded with handicap ramp and access that is up to code.

The macadam's sidewalk from the corner of Acer to the woods, would be removed and grass planted to absorb the water run-off.

Please let us know the next steps. Thank you for your consideration.

Josh and Christine Allen
