No Nonsense Neutering would like to give a presentation to the Board on a Community Cat Program

What is a Community Cat Program? Community Cat Programs are established by municipalities in partnership with spay/neuter providers. Services that can be offered include:

- Education of residents on Trap-Neuter-Release as a solution for managing stray cat populations.
- Offer discounted sterilization at local clinics
- Lend humane traps to residents.

What is the cost? CC Programs are flexible. Cost may be determined by the Township and changed as needed. Use existing resources such as newsletters and the website to get the message out. Flyers may be purchased from organizations such as Alley Cat Allies for a minimal cost. The Township can choose to copay the spay and neutering services for Township residents. The Township could purchase and loan traps to residents.

What is TNR? Healthy, unowned cats are trapped, sterilized, eartipped, vaccinated and put back where they were found.

Who has a program in Berks County? St Lawrence Boro and West Reading Borough.
