- Snow should be shoveled or plowed to the right side of the driveway as you are facing the intersecting roadway. By piling the snow will not be pushed back onto the driveway.
- Eliminate snow piles at the property entrance whenever possible. High accumulations of snow can obstruct the vision of motorists, posting a safety hazard.

Planning a Home Project? Make sure to start looking into getting a permit sooner than later. Late spring/early summer is a particularly busy time for home improvements. Permit applications begin to stack up and delay the time it takes for the permit to be approved.

If you plan to dig on your property, make sure to call 811 or look up Pennsylvania 811's website. They will make sure you avoid any wiring or pipes that are buried in the ground when you dig.
